

## 2018 PRICE LIST FOR VIRUS TESTS

### Leaf and Tuber\* Tissue - (5 days)

(Virus tested = PVY<sup>O/C</sup>, PVY<sup>N</sup>, PLRV, PVX, PVA, PVV, PVS, PVM, TBRV, PMTV)

N° viruses tested	Fixed Price (£)	Price / sample (£)
	1-30 samples	> 30 samples
1	40	1.35
2	45	1.55
3	50	1.75
4	55	1.95
5	60	2.15
10	80	3.15

\*Diagnosis of viruses in tubers by direct tuber ELISA test is only recommended directly after harvest

### Post-Harvest Tuber Tests

#### Growing-On Tests (ELISA) = 4 to 6 weeks (120 tubers / crop)

- Growing-on test for "all PVY strains" ..... £135
- Growing-on test for 2 different viruses ..... £155
- Testing sample for additional viruses (per virus) ..... £20
- Minimum charge ..... £60
- Individually labelled tubers: Price as quoted for leaf and tuber tissue (above) + £1.20 per tuber for removal of eye-plugs and growing-on

#### Rapid Direct Tuber Tests\* (Real-Time RT-PCR) = up to 5 days (120 tubers / crop)

- Generic.....PVY (*all strains*) ..... £240
- Potyviruses.....PVA, PVV .....each + £30
- Potexvirus & Leaf Roll .....PVX and PLRV .....each + £30
- Spraing.....PMTV and TRV .....each + £30

\* Diagnosis of viruses in tubers by Real-Time RT-PCR is only recommended directly after harvest)

### Spraing Tests

- Testing symptomatic tubers by Real Time RT-PCR (up to 5 days, 6 tubers) for *Tobacco rattle virus* (TRV) and *Potato mop top virus* (PMTV)..... £100
- Additional tubers.....each + £15
