## 1 SUPPLY OF OFFICIAL SEED CERTIFICATION LABELS

The current contract with Integrity Print to supply official seed certification labels has been extended until 31 December 2020. There has been no price increase since 1 January 2016, however, in line with the Consumer Price Index (CPI) new prices will apply from 1 January 2019. The schedule of new prices follows at the end of this letter.

Please place your orders using the online system. If you are not yet registered to do so please contact:

**Label orders/Customer Service –**  
Sales Office

T: 01761 409590  
E: [apha@integrity-print.com](mailto:apha@integrity-print.com)

You may also order by email.

### Delivery

England, Wales and Scotland - labels will be supplied within 10 working days of the order being placed for companies based in England, Wales and Scotland.

Northern Ireland - labels will be supplied within 12 working days of the order being placed for companies based in Northern Ireland.

Although in most instances labels may be supplied sooner than these lead times you should ensure you allow enough time when ordering for the labels to be supplied. There is no delivery charge.

### Specification

The size and layout of the labels has not changed. However, the UK's Exit from the EU may have implications for the continuing use of the current official Seed Certification labels. Although leaving the EU may lead to changes in labelling requirements, we are currently unable to give details on what form these changes may take. **We therefore suggest that seed companies consider avoiding large stocks of labels as future label requirements may differ from those currently in place.**

## Bespoke labels

Requests for bespoke labels, for use in Scotland (those not covered by the statutory range) must be approved by SASA in advance of production. Please send the full details of requirements, including draft design, to Seed Certification at SASA or by email to: [seeds@sasa.gov.scot](mailto:seeds@sasa.gov.scot)

Item code	Category	Colour	Price per 1000 (£)
<b>Tear resistant</b>

## Seed Certification Labels – Bespoke label request

Request for permission to produce official labels which allows the addition of trade information or other bespoke requirements.

Note: The DEF 1005 and 1015 Mixture labels are the only double-length label available from stock – all other extended labels must be approved in advance by SASA and the price then negotiated between the company and the contractor.

All official information/colour as required by the Seed Marketing Regulations must still be included and the minimum size adhered to. Please note: approval must be given by SASA to ensure compliance with Regulations, before you contact the label contractor for a quotation. Repeat orders with exactly the same requirements do not need permission from SASA. Delivery may exceed 10 working day with agreement of customer.

**Return to: SASA, Roddinglaw Road, Edinburgh, EH12 9FJ**
